

AI Meets CloudStack

Simplifying Cloud Operations with StackAI

**IF AI CAN DO SO MUCH...
WHY NOT CLOUD
OPERATIONS?**

GOODBYE MENUS. HELLO CONVERSATION.

- 1 Tell the cloud what you want, not how to do it
- 2 Type → AI understands → Executes
- 3 100% permission-aware
- 4 Compliance built-in: every move is logged.

✨ Ask StackAI Anything

Create a new VPC named 'cloudstack' with two subnets: 'stackconsole' and 'stackai'. Deploy one VM in each subnet with 2GB RAM, 2 vCPUs, 60GB disk, running Ubuntu 22.04, under the project 'default'

Set up a load balancer for my website

Send me today's usage and cost report.

Ask me anything about your projects
